

resilienceOS

adapts to the way you
want to operate

Built by operators, for operators

Built from the ground up and unified by design, resilienceOS is an end-to-end, integrated platform with a growing ecosystem that adapts to the way you want to operate, providing a better way to protect your people, assets and organization.

Rather than rely on a fragmented patchwork of systems and data, resilienceOS brings clarity to your organization, empowering you to:

Unify your data

Centralize all your critical data, transforming it into actionable intelligence for faster, smarter decisions.

Gain insights

Cut through alert fatigue by prioritizing threats with smarter filtering, custom workflows and 24/7, automated risk impact assessments.

Take action

Equip your crisis team with everything they need to triage risks, send emergency alerts and manage critical incidents.

"The ability for us to take data that is flowing in from multiple external providers, and integrate and visualise that data seamlessly with resilienceOS, gives us the exact outcome we were looking for."

Trusted by industry-leading companies to protect what matters most

Your operational goals. One resilience platform.

resilienceOS is more than an end-to-end platform; it's your technology partner in achieving comprehensive, unified organizational resilience. Whether you're starting small or upgrading your entire critical event management operations, resilienceOS provides advanced tools, flexibility and scalability tailored to how you want to operate.

LOCATE

Locate and protect everything that matters.

MONITOR

Understand the real risks to your organization. Faster.

RESPOND

Triage threats quicker. Streamline your emergency response.

COMMUNICATE

Deliver smarter critical communications.

CONNECT

Enhance the safety of your workforce, wherever they are.

"Restrata's solution is a critical leap forward for safety in our industry. Real-time data from our sites provides the visibility needed to optimize operations, improve decisions and save lives."

About Us:

Restrata was originally founded as the technology arm of one of the world's largest security services companies, providing design, prepare and respond solutions in high threat areas over many decades. We witnessed first-hand the extreme pain of data siloes and system-hopping and the negative impact on response efforts that endangered lives, put business assets at risk and disrupted continuity. This deep industry expertise led us to build resilienceOS, one end-to-end platform built from the ground up to unify your data, gain insights and take action.
